

GUIDELINES FOR ASC SURGERY

General Guidelines

Do not apply any make-up, face creams, or moisturizers on the day of surgery. You should dress in comfortable, loose-fitting clothing – preferably a button-down shirt. Please do not bring any unnecessary valuables with you to the office.

Transportation

Arrange for transportation to and from the surgery center prior to your surgical date. Typically you will need to arrive one (1) hour prior to your scheduled surgery time, but confirm this time with the staff. Taking a taxi home from surgery is **not** an acceptable form of transportation if you have had any sedative medication as part of your surgical procedure.

Diet

You must avoid eating and drinking (including water) after midnight the night before your scheduled surgery.

Prescriptions

Dr. Hilinski typically provides you with a prescription for postoperative medication (narcotic pain reliever and an antibiotic) prior to your surgical date. If a prescription was not provided, contact our office to have one called in to your local pharmacy. These medications should be picked up **before** your scheduled date so that you have them available once you get home from surgery.

If you are undergoing skin resurfacing, there are medications you will need to take prior to surgery. Dr. Hilinski will start you on a skin preparation regimen (prescription topical medication) two weeks prior to your procedure. He will also prescribe you an anti-viral prescription medication to begin taking two days before your scheduled procedure.

Medications to Avoid

Our office has a list of 'Restricted Medications' that you need to abide by at least two (2) weeks in advance of your procedure date. If you misplace the one provided to you, the list is always on our website for you to download and reference. Tylenol is acceptable to take if you are having any pain symptoms leading up to surgery. If you have any questions regarding medication you are currently taking, please contact our office.

Follow-up Appointment

Confirm a follow-up appointment with Dr. Hilinski (usually 4-7 days after surgery but this may vary) by contacting our office at (619) 296-3223.
